

HYDRAULIC POWER PACK

The Hydraulic Power Pack is powered by an efficient Kubota 13.5 HP diesel engine, electric start, water cooled and fitted with a variable speed throttle control lever. The lightweight unit is designed for easy maintenance and serviceability.

The Hydraulic Flow is produced by a single hydraulic pump supplying a dual spool operating valve enabling the operator to select flow on/off and pressure and return porting. Options are available for output requirements (LPM) via a flow control valve or a specific pump specification (40/50/60 lpm).

The unit cannot only be used with the Red Rhino SP30 Stockpiler but is a versatile hydraulic unit and can be adapted to suit other tools and equipment.

Its compact size can easily be transported by a small FLT via two fork truck access channels.

STANDARD FEATURES

Kubota Z602 13HP 10.3KW 2Cyl	Hydraulic pump producing 40-60LPM
Electrical 12v System, key start, engine management fail safe system, emergency stop	80 Litre hydraulic tank c/w return filter
Fuel System unique quick replacement jerry tank fuel tanks, 40 litre capacity	2 Lever spool valve with forward/rev flow, up/down pressure

DIMENSIONS

Length	1,000mm
Width	900mm
Weight	350kg
